

2019 NDAREC WEBINARS

UNDERGROUND DISTRIBUTION DESIGN

Engineering and Operations Webinar

WEBINAR DATE:

April 16, 2019

TIME:

10 to 11:30 a.m. Central Time

REGISTRATION DEADLINE:

April 10

GENERAL WEBINAR FORMAT:

Each 90-minute webinar will include approximately 60 minutes of instruction and 30 minutes for a question-and-answer session. Most presentations will be in Power Point format with the handout provided in pdf format.

WEBINAR OVERVIEW:

Designing underground distribution differs from designing overhead distribution in terms of resiliency of the system. This webinar addresses common underground design criteria such as methods for design in underground subdivisions and commercial developments, routing of cable systems, use of conduit, burial depth, and common errors in design. Single contingency outage and overcurrent protection scheme will be addressed, along with limiting factors of system components.
